

PORTABLE WAVE GENERATOR: FILM CHARLIE ST. CLOUD PROJECT

Virginia Beach, Virginia

completion date: Fall 2009

project description: Completed in the Fall of 2009. Ocean Innovations was hired by Universal Studios to provide special effects for a major motion picture starring Zac Efron, Amanda Crew, & Kim Bassinger, being filmed in Vancouver, B.C, scheduled for release in 2010. Zircon FX Special Effects Studios needed a Portable Wave Generator (The WaveMaster™) “Right Away” for a specialized shoot simulating the reproduction of a very specific rogue wave. The project was a total success and everyone was very excited and pleased with the performance of The WaveMaster™ Portable Wave Generator.
